ABOUT US

DELTA Group is a growing construction and building solutions group in the Philippines, committed to delivering innovative, cost-efficient, and high-quality construction solutions. Through our companies, strategic partnerships, and expanding portfolio of building technologies, we provide comprehensive services ranging from ***design, general construction and project management to imporation of pre-engineered steel buildings, innovative masonry materials, and modular housing solutions***.

OUR COMPANIES

DELTA DNC INC. – Our Pioneer Company

Established in February 2018, ***DELTA DNC INC.*** is our pioneering construction company, duly registered and licensed by the Philippine Contractors Accreditation Board ***(PCAB) under Category B***. Starting as a fit-out contractor specializing in residential and commercial projects, the company gradually expanded its capabilities into industrial, commercial, and multipurpose building construction.

Our experience and commitment to delivering quality projects laid the foundation for the growth and expansion of the DELTA Group.

DELTACON INCORPORATED – Expanding Our Capabilities

Registered in May 2026, ***DELTACON INCORPORATED*** represents the next phase of our company's growth and expansion. Operating as a general construction company and importer of innovative building materials and structural systems, DELTACON strengthens our capacity to provide integrated construction solutions to the Philippine market.

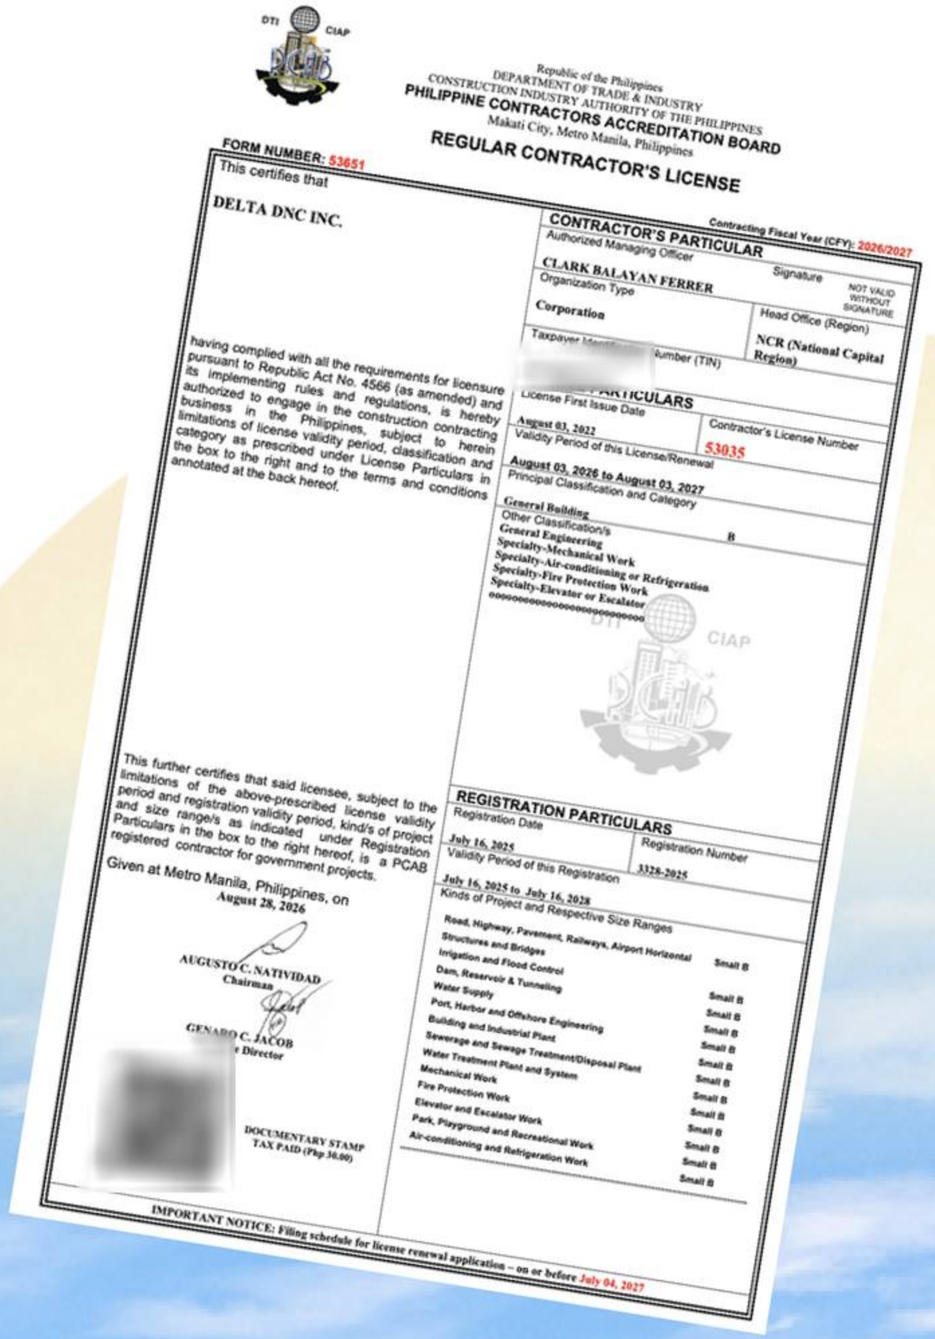

OUR KEY BUSINESS SEGMENTS INCLUDE

Pre-Engineered Buildings (PEB): As an exclusive Philippine partner of SEICO Group, we import and provide engineered steel building systems for industrial facilities, warehouses, commercial establishments, and multipurpose structures.

Autoclaved Aerated Concrete (AAC) Blocks: We import lightweight AAC blocks, an innovative masonry solution that offers advantages in terms of reduced structural dead load, thermal insulation, and construction efficiency.

Modular Housing Solutions: We explore and provide modular building systems designed to support faster, more efficient, and scalable construction.

SEC CERTIFICATE

REPUBLIC OF THE PHILIPPINES
SECURITIES AND EXCHANGE COMMISSION
PICC Secretariat Bldg., PICC Complex
Pasay City, Metro Manila

COMPANY REG NO. CS201800467

CERTIFICATE OF INCORPORATION

KNOW ALL PERSONS BY THESE PRESENTS:

This is to certify that the Articles of Incorporation and By Laws:

DELTA DnC INC.

were duly approved by the Commission on this date upon the issuance of this Certificate of Incorporation and By Laws in accordance with the Corporation Code of the Philippines (Batas Pambansa Blg. 68), and copies of said Articles and By Laws are hereto attached.

This certificate grants juridical personality to the corporation but does not authorize it to undertake business activities requiring a Secondary License from this Commission such as, but not limited to acting as: broker or dealer in securities, government securities eligible dealer (GSED), investment adviser of an investment company, close-end or open-end investment company, investment house, transfer agent, commodity/financial futures exchange/broker/merchant, financing company, pre-need plan issuer, general agent in pre-need plans and time shares/club shares/ membership Certificate issuers or selling agents thereof. Neither does this Certificate constitute as permit to undertake activities for which other government agencies require a license or permit.

As a registered corporation, it shall submit annually to this Commission the reports indicated at the back of this certificate. Failure to submit annual Financial Statements and General Information Sheets within two (2) years from date of incorporation shall be construed that the corporation has not been formally organized and has not commenced the transaction of its business, thus be subject of Suspension Order

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of this Commission to be affixed to this Certificate at PICC Secretariat Bldg., PICC Complex Pasay City, Metro Manila, Philippines, this day of 02 February, Twenty Eighteen.

CERTIFICATE OF INCORPORATION

KNOW ALL PERSONS BY THESE PRESENTS:

This is to certify that the Articles of Incorporation and By Laws of:

DELTACON INCORPORATED

were approved by the Commission on this date upon the issuance of this Certificate of Incorporation in accordance with the Revised Corporation Code of the Philippines (Republic Act No. 11232), which took effect on February 23, 2019 and copies of said digitally signed and digitally authenticated Articles of Incorporation and By Laws automatically form part of the records of the corporation in the Commission.

This electronically issued digital Certificate grants juridical personality to this corporation but **DOES NOT AUTHORIZE it:**

A. To issue, sell or offer for sale to the public, securities such as but not limited to, shares of stock, investment contracts, debt instruments and virtual currencies without prior Registration Statement approved by this Commission;

B. To undertake business activities such as, but not limited to acting as: broker or dealer in securities, government securities eligible dealer (GSED), investment adviser of an investment company, close-end or open-end investment company, investment house, transfer agent, commodity/financial futures exchange/broker/merchant, financing/lending company, and time shares/club shares/membership certificate issuers or selling agents thereof; nor to operate a fiat money to virtual currency exchange nor engage in investment solicitation and investment taking **requiring a Secondary License** from this Commission.

C. To act as a permit to undertake activities for which other government agencies require a license or permit.

This Certificate is granted subject to the conditions on the next page of this document.

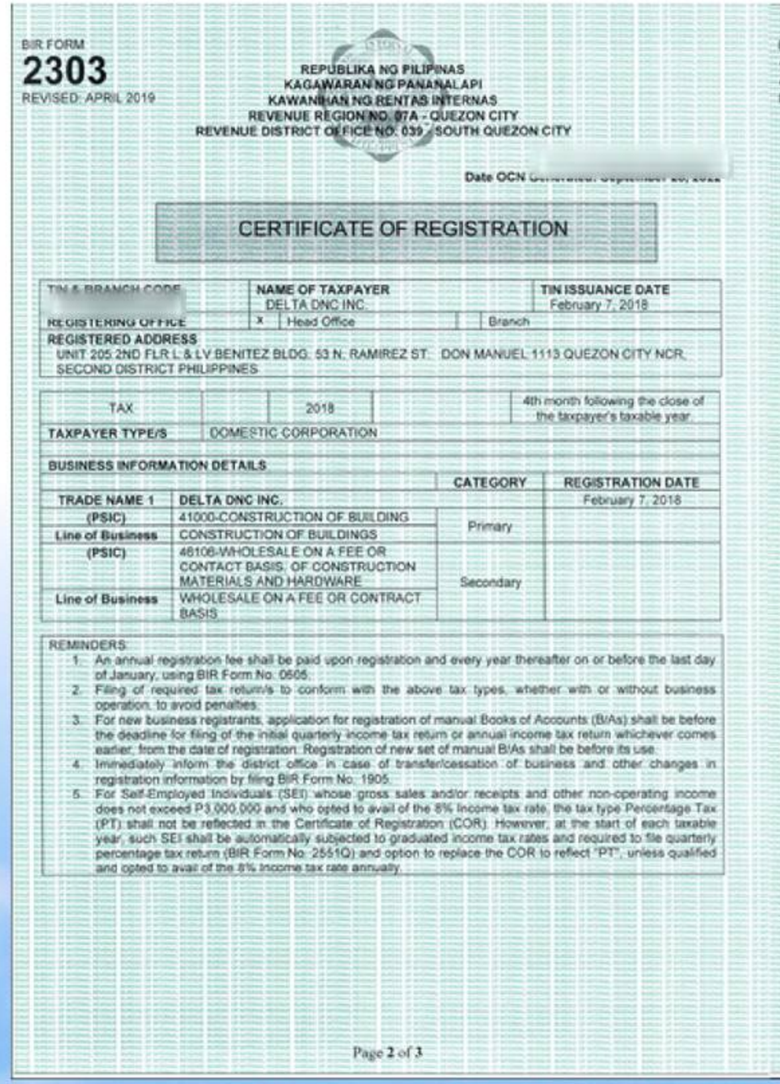

This Certificate is issued at The SEC Headquarters 7907 Makati Avenue, Salcedo Village, Barangay Bel-Air, Makati City, 1209, Metro Manila, Philippines, on this day of 26 May Two Thousand Twenty Six.

OUR STRATEGIC PARTNERSHIP WITH SEICO JSC GROUP

IMPORT

DELIVER

INSTALL

GUARANTEED

Our strategic partnership with SEICO Group is a significant milestone in the development of DELTA Group. Through this partnership, we bring internationally developed pre-engineered steel building solutions to the Philippine construction industry.

Our goal is to make international steel building technology more accessible to the Philippine market by providing clients with a single, reliable local partner who oversees the entire process. From the procurement and importation of steel components to their delivery and professional installation on-site, we take the complexity out of sourcing and building with imported steel structures.

Furthermore, our partnership provides clients with the assurance of applicable product and structural warranties, reliable technical coordination, and local project support. This means less hassle, fewer coordination concerns, and greater peace of mind for our customers.

With **DELTACON and SEICO JSC**, clients don't just purchase steel structures — they get a complete building solution, **delivered and installed**, with the confidence of a trusted local partner.

PHAM DUC LAM

OUR CONSTRUCTION PHILOSOPHY

We believe that successful construction is not simply about building structures. It is about finding smarter ways to build without compromising ***quality, safety, and structural integrity.***

Through our expertise in conventional construction and pre-engineered steel building systems, we aim to bring together three essential factors in every project:

COST SAVING + FASTER CONSTRUCTION + QUALITY

By integrating engineering innovation, efficient construction methodologies, and reliable building materials, we help clients optimize project costs, shorten construction timelines, and achieve durable, functional structures.

OUR VISION

To become one of the leading and most trusted construction and building solutions groups in the Philippines, recognized for engineering excellence, innovative construction technologies, and our commitment to delivering value to every client.

OUR COMMITMENT

At **DELTA Group**, we continuously challenge traditional construction practices by embracing innovation, strategic partnerships, and modern building technologies.

From residential and commercial fit-outs to large-scale industrial facilities, warehouses, and modular structures, we remain committed to one goal:

Building smarter. Building faster. Building better.

WHAT ARE PRE - ENGINEERED BUILDINGS?

Pre-Engineered Buildings are the building components that are manufactured at a factory and assembled on site. These are pre-designed steel structures and can be an alternative to conventional structural buildings. **The structural components are fabricated at the factory to the exact size, transported to the site, and assembled at the site as bolted connections**

Why Construction Quality Matters

Concrete structures can become vulnerable when:

- **Design assumptions are incorrect**
- **Reinforcement is improperly installed**
- **Concrete quality is inconsistent**
- **Construction deviates from approved plans**
- **Site supervision and quality control are inadequate**

Because much of the work is performed on-site, quality can vary depending on workmanship and field conditions.

Key Takeaway & PEB Advantage

Construction safety is not determined by material alone—it depends on engineering, quality control, and execution.

Pre-Engineered Buildings help reduce construction risks through:

✓ **Factory-controlled fabrication**
✓ **Precision engineering and detailing**
✓ **Consistent material quality**
✓ **Reduced on-site welding and fabrication**
✓ **Faster and more efficient installation**
✓ **Compliance with project-specific design loads and standards**

Photo credits: Jire Carreon/Rappler

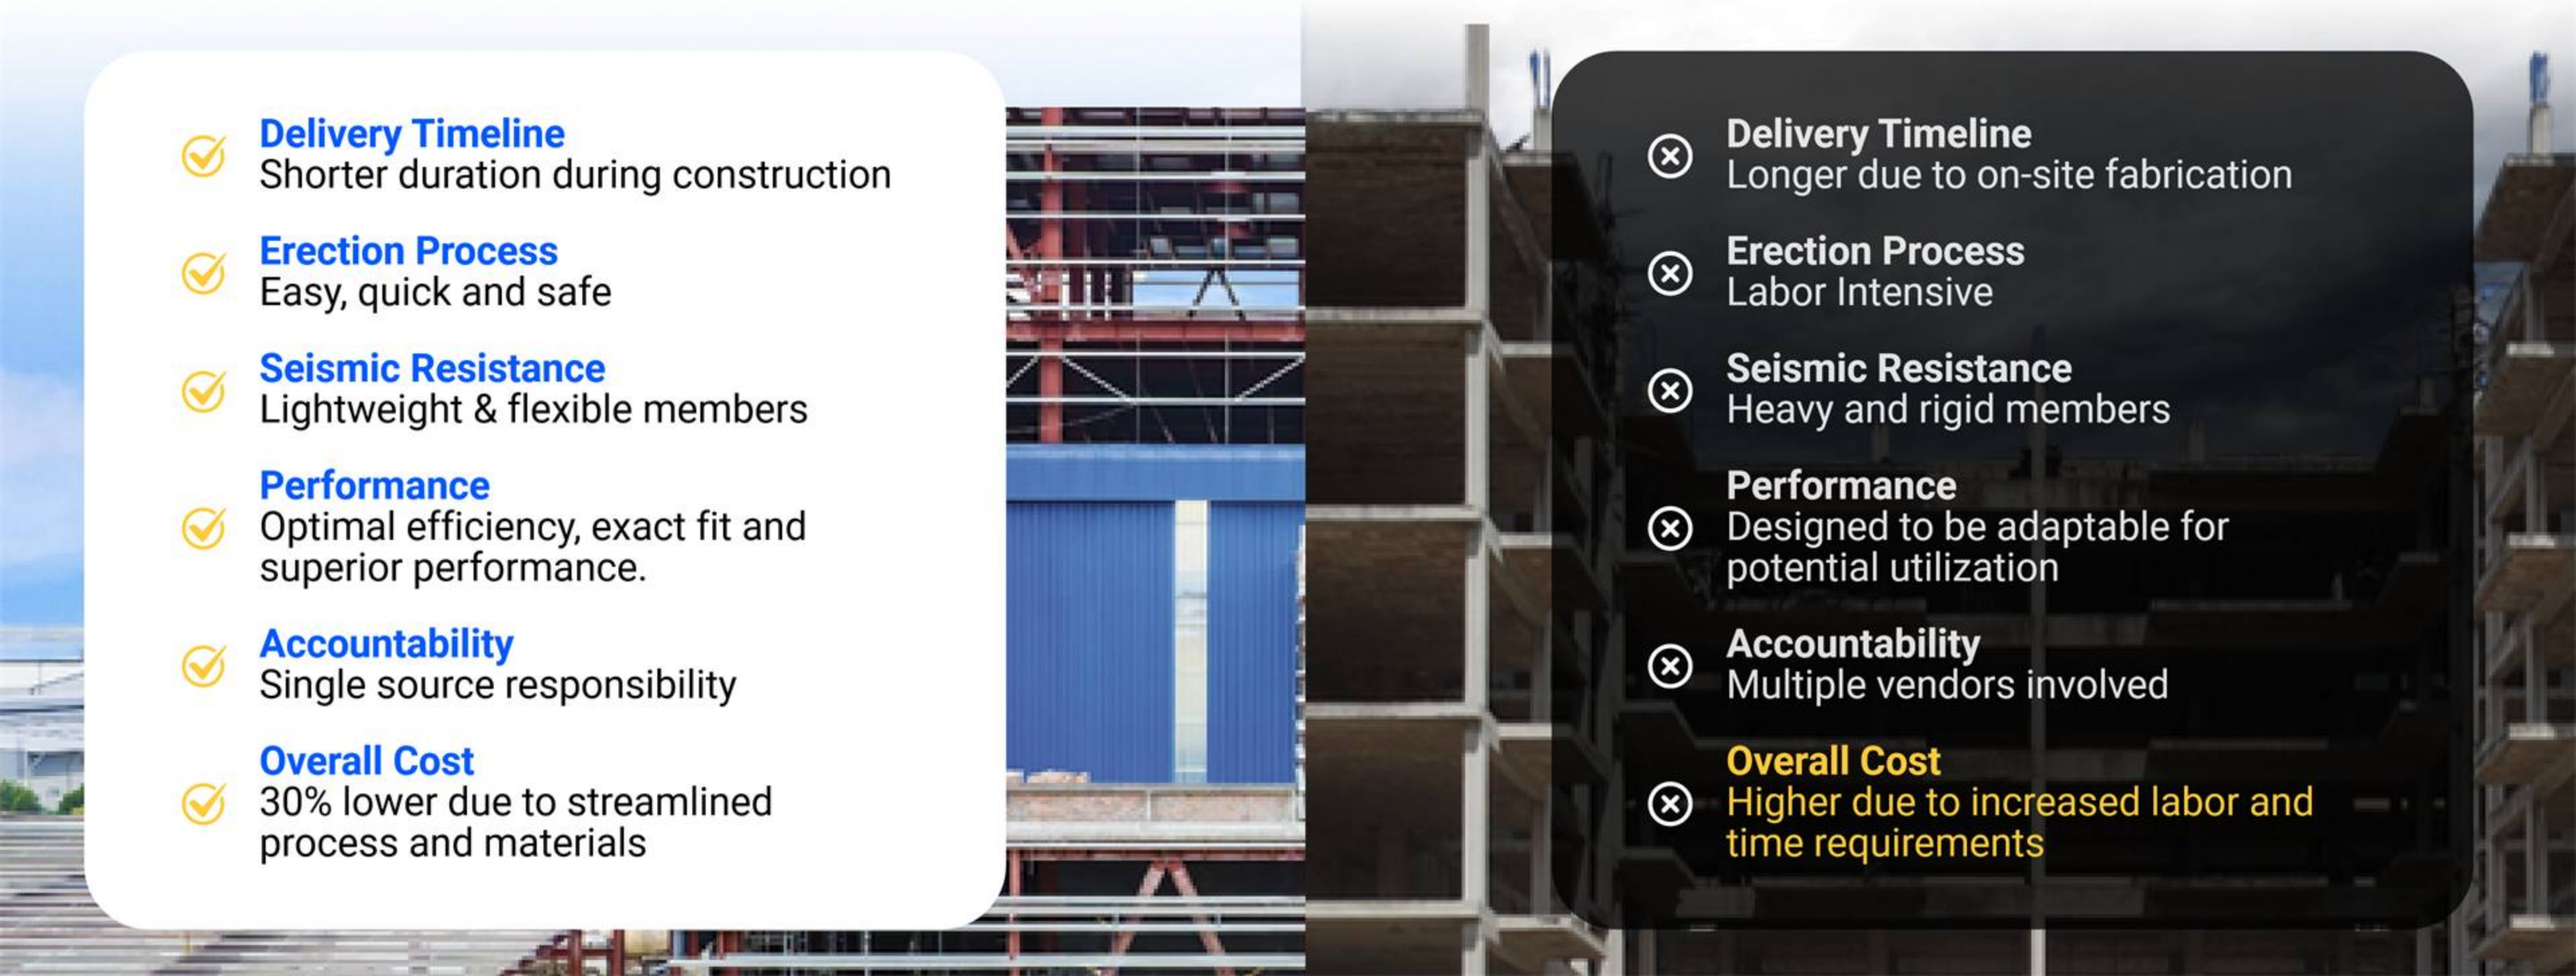

WHY PEB IS THE SMARTER CHOICE

PRE-ENGINEERED BUILDING

VS

CONVENTIONAL BUILDING

- **Delivery Timeline**
  Shorter duration during construction
- **Erection Process**
  Easy, quick and safe
- **Seismic Resistance**
  Lightweight & flexible members
- **Performance**
  Optimal efficiency, exact fit and superior performance.
- **Accountability**
  Single source responsibility
- **Overall Cost**
  30% lower due to streamlined process and materials

- **Delivery Timeline**
  Longer due to on-site fabrication
- **Erection Process**
  Labor Intensive
- **Seismic Resistance**
  Heavy and rigid members
- **Performance**
  Designed to be adaptable for potential utilization
- **Accountability**
  Multiple vendors involved
- **Overall Cost**
  Higher due to increased labor and time requirements

Concrete Construction

(Traditional)

Requires multiple materials & processes:

Cement | Sand | Gravel | Rebars | Formworks

- Skilled labor plus supversion
- Heavy manpower requirement
- Weather-dependent curing process
- Weather-dependent curing process
- **Longer construction timeline**

Conventional Steel Structure

Requires on-site fabrication & assembly:

- Steel cutting and grinding
- Painting / anti-rust coating
- Welding works
- Quality depends heavily on workmanship
- Acetylene / gas cutting
- Rust / corrosion risks if not maintained
- Skilled welders & fabricators
- Weather can delay installation

More on-site adjustments needed

Pre-Engineered Buildings

Factory-built, precision-engineered system:

- Pre-designed steel components
- Minimal manpower required
- Factory fabrication (controlled quality)
- Reduced waste and consumables
- Bolted connections (minimal welding on-site)
- Less weather disruption
- Fast assembly on site
- Faster project completion

Consistent structural quality

Conventional Steel

Labor-intensive, time-consuming, and highly weather-dependent

Pre-Engineered Buildings (PEB)

Clean, fast, efficient, and engineered for precision

Conventional Steel Structure

Faster than concrete but still dependent on site work and manual fabrication quality

STRUCTURAL SYSTEM COMPARISON:

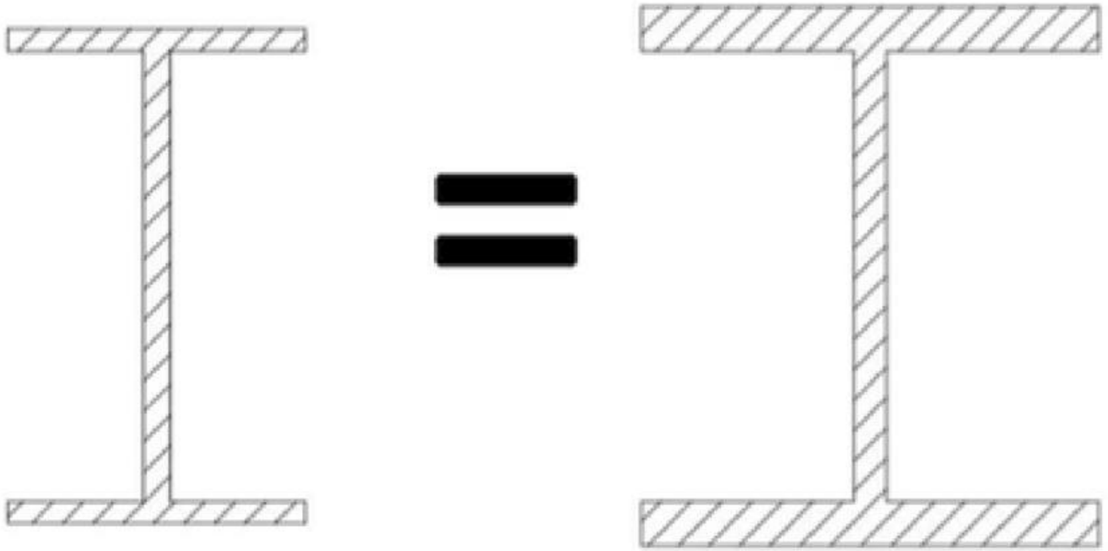

Structural Type	Construction Speed	Material Efficiency	Overall Cost Efficiency
Reinforced Concrete (RC)	Slow - wet works, curing	High material waste	Higher material and manpower costs
Conventional Steel	Moderate - site fabrication	High material waste	Higher fabrication and labor costs
Pre-Engineered Building (PEB)	**Fastest - factory-built, quick install**	**Optimized, minimal waste**	Optimized materials and reduced labor costs

COST SAVING

20-30% lighter than conventional buildings

SMALLER SECTION

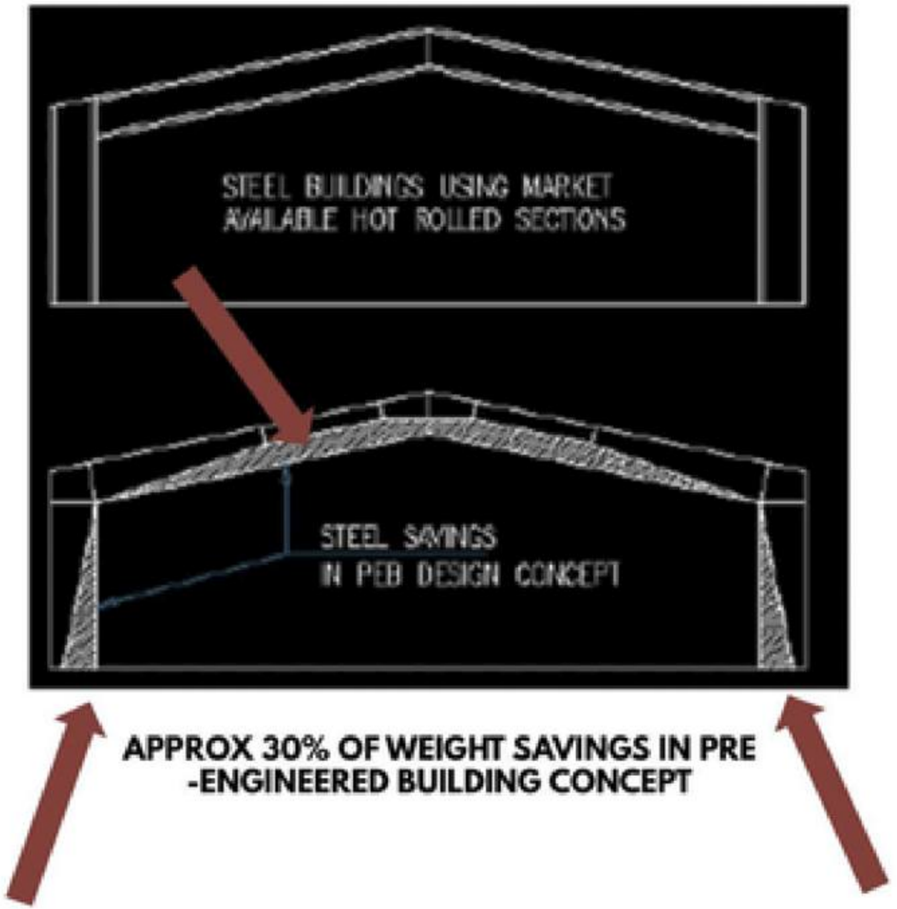

HIGH GRADE STEEL
Primary Members: Grade 50

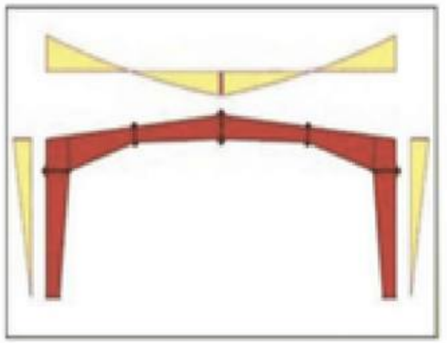

NORMAL GRADE STEEL
Primary & Secondary: Grade 36

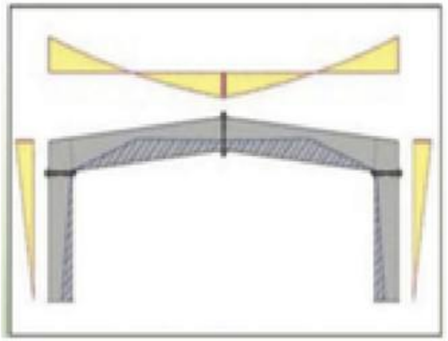

COST SAVING

The use of tapered steel sections in pre-engineered buildings offers significant cost savings by optimizing material usage, reducing weight, streamlining fabrication and installation processes, and enhancing the building's aesthetic appeal. These savings contribute to the overall affordability and efficiency of the construction project.

SIMPLE FRAME OF PRE-ENGINEERED BUILDING

SIMPLE FRAME OF NORMAL STEEL BUILDINGS

EASY ASSEMBLY

The standardized components and simplified assembly process of pre-engineered buildings generally result in faster construction times compared to conventional steel construction. This efficiency can lead to cost savings and quicker occupancy of the building.

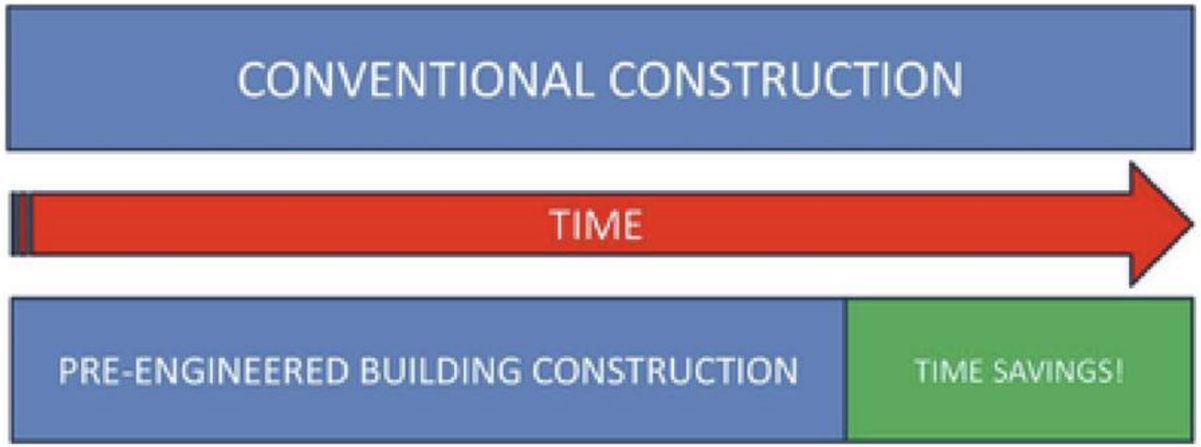

TIME SAVINGS!

Pre-engineered buildings are assembled on-site using prefabricated components that are designed to fit together seamlessly. This modular assembly process is typically faster and requires less on-site fabrication compared to conventional steel construction, where each component may need to be fabricated and assembled on-site.

In conformità al Regolamento UE n. 305/2011 del Parlamento Europeo e del Consiglio del 9 marzo 2011 che fissa condizioni armonizzate per la commercializzazione dei prodotti da costruzione, Apave Italia Cpm Srl, organismo notificato presso la Commissione Europea con numero 0398, emette il seguente

CERTIFICATO CE

di conformità del controllo di produzione di fabbrica

0398/CPR/MP/20.023 **CE 0398**

Produttore / Sede	SEICO JSC No.160, Hoang Ngan Street, Trung Hoa Ward, Cau Giay District (Hanoi City, Vietnam)
Stabilimento/i	Km 40+900 National Road Nr 5, Com Giang District, Hai Duong Province (Vietnam)
Prodotto/i	Strutture metalliche in Acciaio
Classe di Esecuzione	EXC 2
Destinazione d'uso	Progettazione/esecuzione di strutture metalliche: Metodi 2, 5a e 5b

Il presente certificato attesta che i prodotti sopra elencati sono sottoposti dal fabbricante al controllo di produzione di fabbrica (FPC), alle prove iniziali di tipo (ITT) ed alle ulteriori prove su campioni prelevati in fabbrica in conformità ad un prescritto programma di prove e che l'Organismo Notificato APAVE ITALIA CPM S.r.l. ha effettuato l'ispezione iniziale degli stabilimenti ed il controllo di produzione di fabbrica ed eseguo la sorveglianza continua, la valutazione e l'approvazione del controllo della produzione di fabbrica, e che tutte le disposizioni concernenti l'attestazione del controllo di produzione di fabbrica descritte nell'allegato ZA della norma:

EN 1090-1:2009+A1:2011

sono state applicate.

Il presente certificato è stato emesso la prima volta il **31/05/2021** e ha validità sino a che le condizioni definite nella specifica tecnica di riferimento o le condizioni di produzione di fabbrica o il suo controllo di produzione non subiscano modifiche significative. E' possibile verificare lo stato di validità del certificato all'indirizzo: http://gecs.cpmapave.it

Bienno, li **31/05/2021**
Revisione n. 0

In compliance with Regulation (UE) 305/2011/EU of the European Parliament and of the Council of 9 March 2011 (the Construction Products Regulation or CPR), Apave Italia CPM Srl, Notified Body by the European Commission with number 0398, issues the following

CE CERTIFICATE
of conformity of the factory production control

0398/CPR/MP/20.023

CE 0398

Manufacturer / Adress	**SEICO JSC** No.180, Hoang Ngan Street, Trung Hoa Ward, Cau Giay District (Hanoi City, Vietnam)
Manufacturing plant(s)	Km 40+500 National Road Nr 5, Cum Giang District, Hai Duong Province (Vietnam)
Product (s)	Steel metallic structures
Execution Class	**EXC 2**
Intended Use(s)	Design/Execution of metallic structures: Methods 2, 3a e 3b

This certificate attests that the products listed above are submitted by the manufacturer to the factory production control, the initial type-testing and to the further testing of samples taken at the factory in accordance with a prescribed test plan that the Notified Body Apave Italia CPM srl has performed the initial inspection of the factories and of the factory production control and performs continuous surveillance, assessment and approval of the factory production control, and that all provisions concerning the assessment and verification of constancy of performance described in Annex ZA of the standard(s).

EN 1090-1:2009+A1:2011

under system 2+ are applied.

This certificate was first issued on **31/05/2021** and will remain valid as long as the test methods and/or factory production control requirements included in the harmonized standard, used to assess the performance of the declared characteristics, do not change, and the product, and the manufacturing conditions in the plant are not modified significantly.

Bonno, **31/05/2021**
