ABOUT US

PEB Philippines, a pioneering force in the nation's Pre Engineered Building sector, excels in innovative construction solutions and excellence. Utilizing Pre Engineered Building solutions from PEB Philippines saves significant time and money through streamlined construction processes, efficient design, and reduced on-site labor requirements, enhancing overall project affordability and timelines.

ENGR. CLARK FERRER

President & CEO

A Mapúa University Class of 2006 graduate and licensed Mechanical Engineer, **he now serves as President and CEO of DELTA DNC INC., bringing 15 years of experience across property appraisal, design-and-build, and construction project management.** Known online as “Mr. Contractor,” he advocates ethical construction practices and delivers innovative, informative, and often entertaining content for the construction industry.

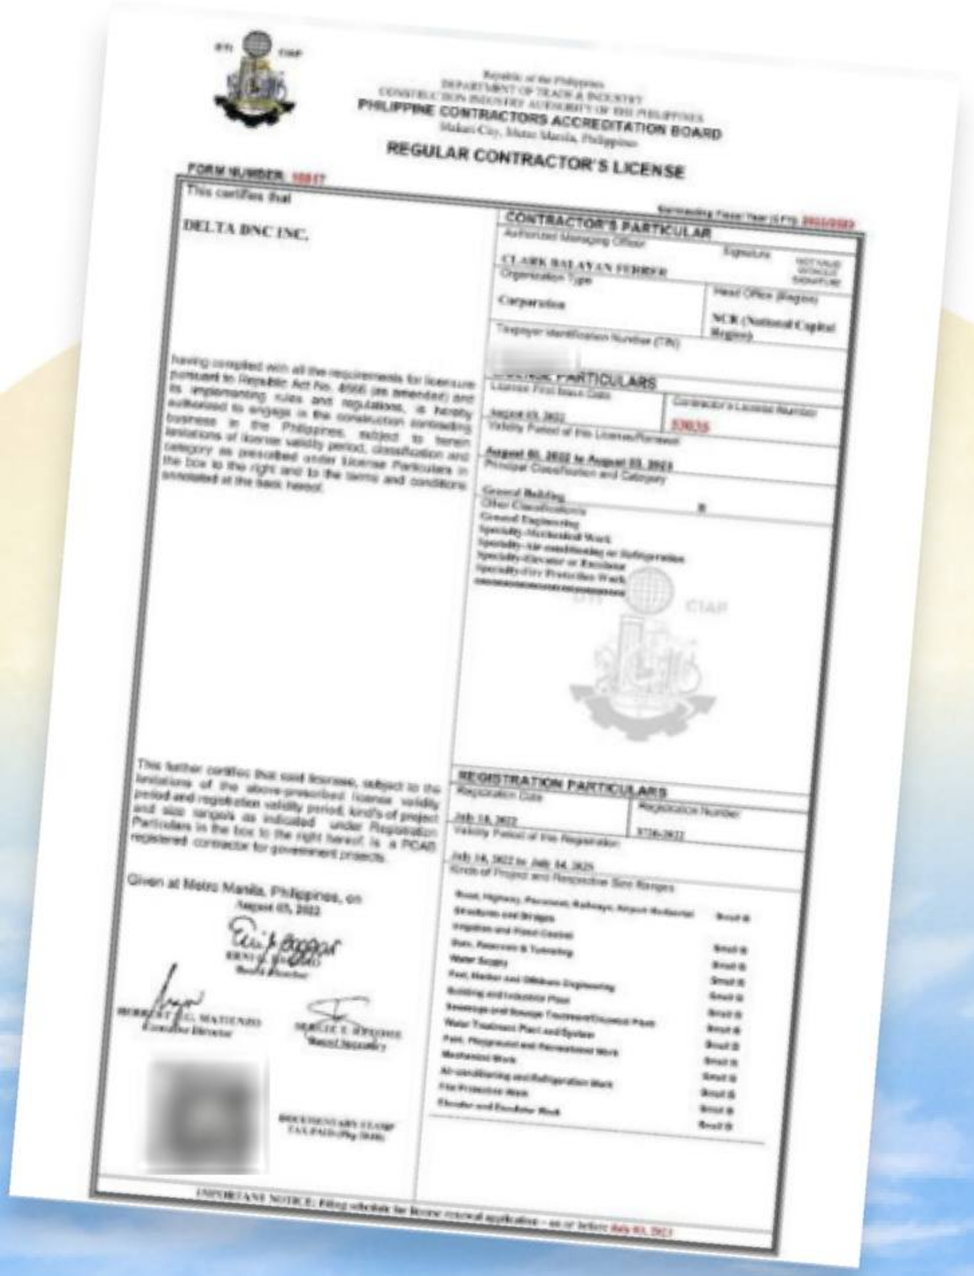

ENGR. EARVYN CARLOS

Vice President

A 2019 Bachelor of Science in Civil Engineering graduate from National University and an SM Foundation Inc. scholar, **he founded Virago Construction, a fit-out and waterproofing firm, at just 24**. He took a Bachelor of Science in Sanitary and Environmental Engineering at the National University. **In 2020, he joined Engr. Clark Ferrer to help build a strong and dynamic team of young construction entrepreneurs.**

STEEL STRUCTURES
by PEB PHILIPPINES

WHAT ARE PRE - ENGINEERED BUILDINGS?

Pre-Engineered Buildings are the building components that are manufactured at a factory and assembled on site. These are pre-designed steel structures and can be an alternative to conventional structural buildings. **The structural components are fabricated at the factory to the exact size, transported to the site, and assembled at the site as bolted connections**

STEEL STRUCTURES
by PEB PHILIPPINES

THE PRE-ENGINEERED BUILDING SYSTEM

PRIMARY

Column, Rafter, Crane Beam

SECONDARY

Purlin, Girt, Bracing, Bolts

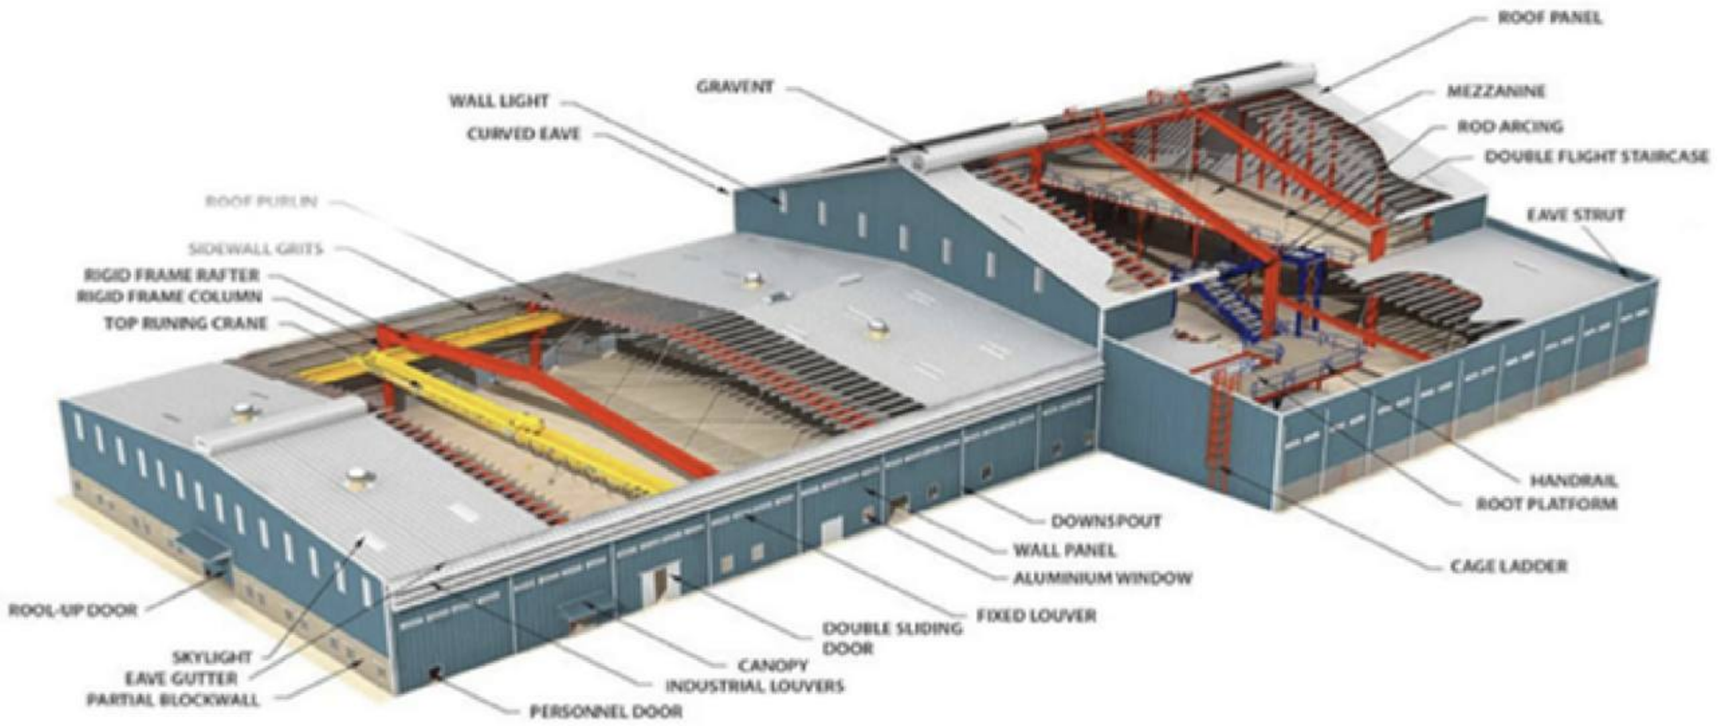

COVERING

Roof, Wall, Vents, Trims, Flashing

STEEL STRUCTURES

STEEL STRUCTURES
by PEB PHILIPPINES

Why Construction Quality Matters

Concrete structures can become vulnerable when:

- **Design assumptions are incorrect**
- **Reinforcement is improperly installed**
- **Concrete quality is inconsistent**
- **Construction deviates from approved plans**
- **Site supervision and quality control are inadequate**

Because much of the work is performed on-site, quality can vary depending on workmanship and field conditions.

Key Takeaway & PEB Advantage

Construction safety is not determined by material alone—it depends on engineering, quality control, and execution.

Pre-Engineered Buildings help reduce construction risks through:

✓ Factory-controlled fabrication
✓ Precision engineering and detailing
✓ Consistent material quality
✓ Reduced on-site welding and fabrication
✓ Faster and more efficient installation
✓ Compliance with project-specific design loads and standards

Photo credits: Jire Carreon/Rappler

CONCRETE BUILDING COLLAPSE INCIDENTS

Rana Plaza (Bangladesh, 2013)

Champlain Towers South (Florida, USA, 2021)

Sampoong Department Store (South Korea, 1995)

Structural failures are often caused by a combination of poor design & materials, unauthorized alterations, construction quality issues, inadequate maintenance, and overloading of the structure.

WHY PEB IS THE SMARTER CHOICE

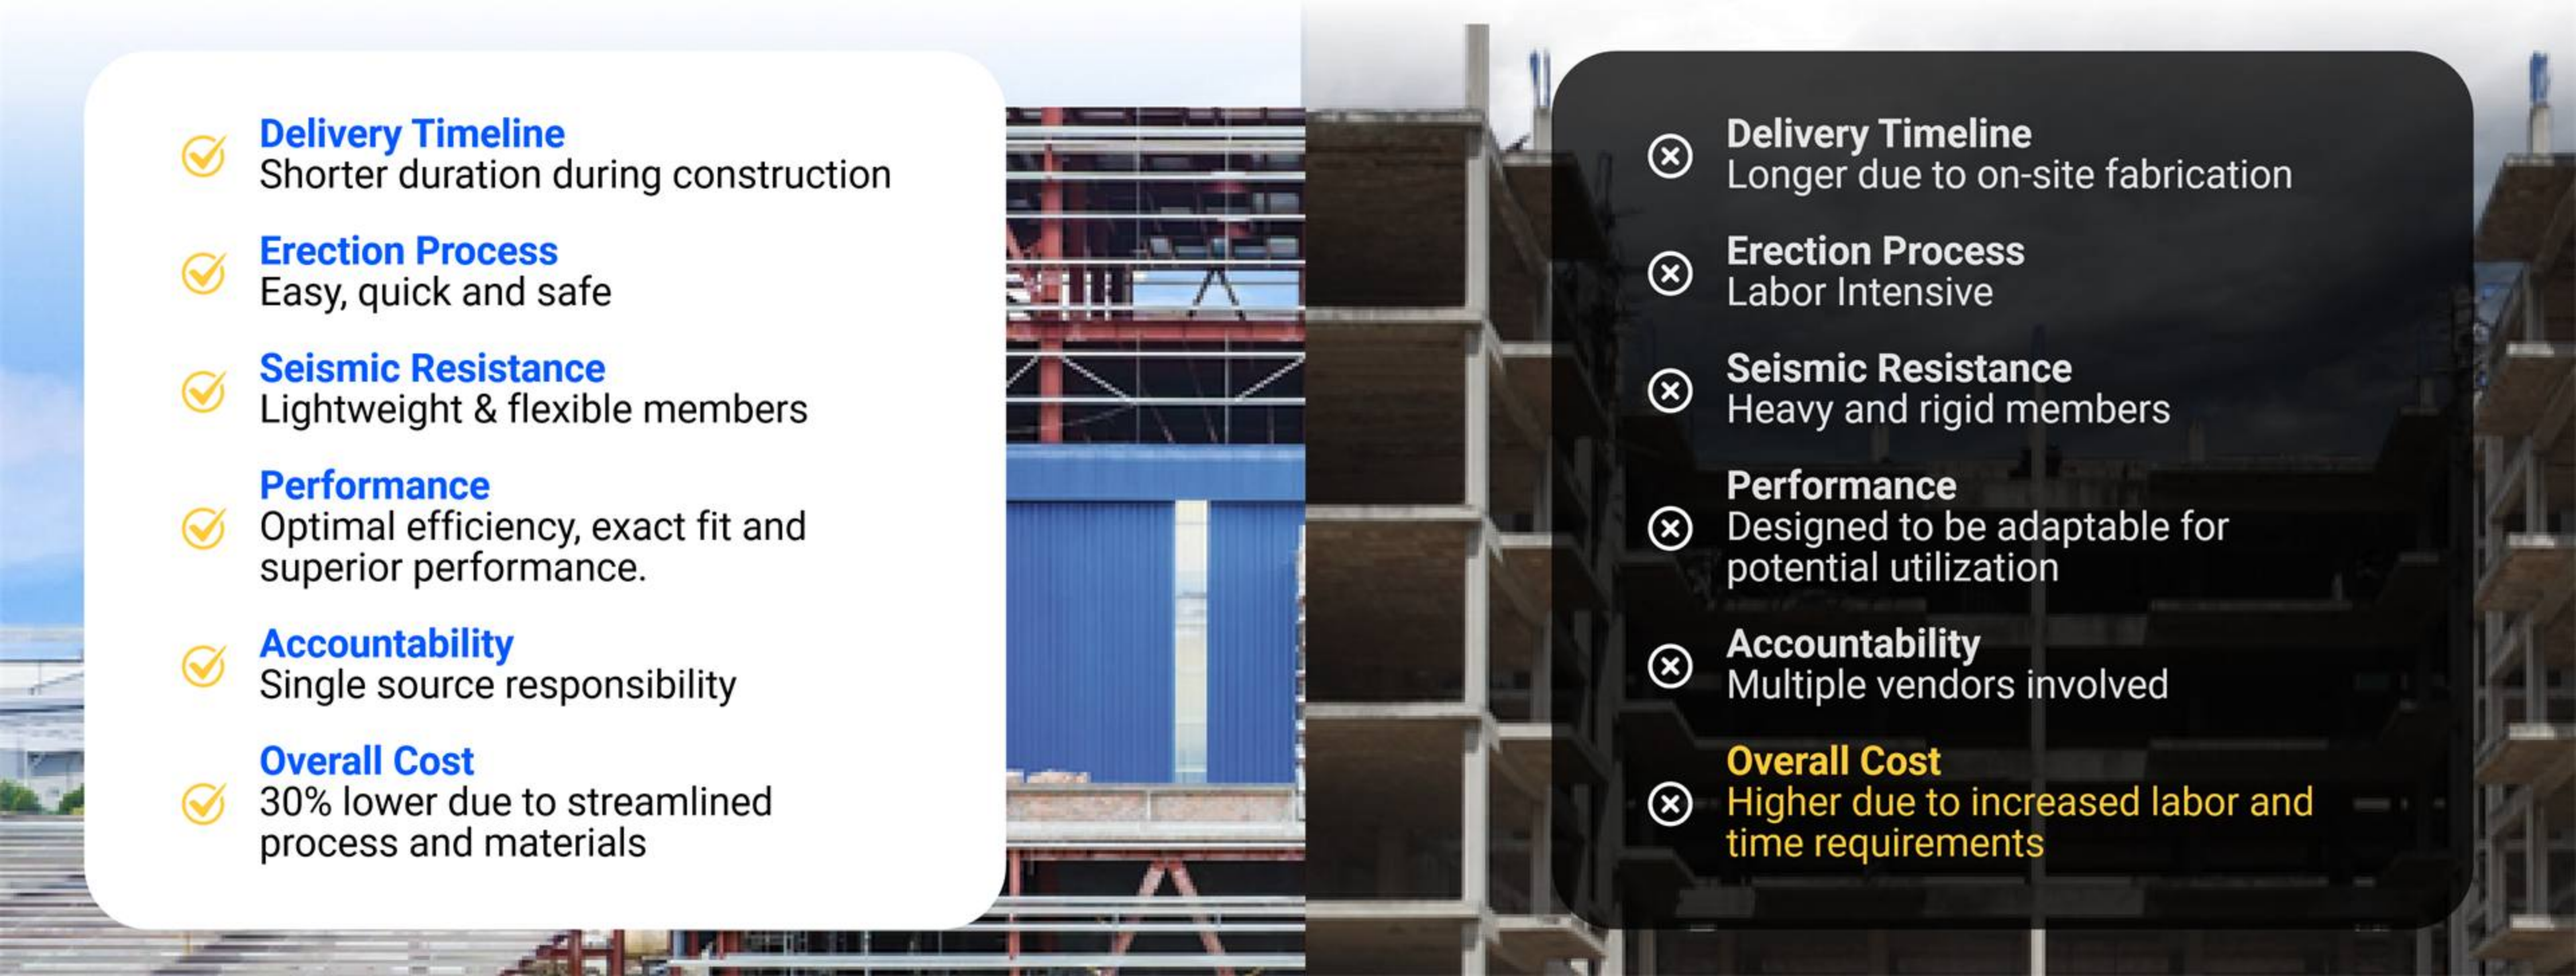

0995 458 9934 fb.com/SteelStrucByPEBPH pebphilsteel@gmail.com @pebphilsteel

PRE-ENGINEERED BUILDING

VS

CONVENTIONAL BUILDING

- **Delivery Timeline**
  Shorter duration during construction
- **Erection Process**
  Easy, quick and safe
- **Seismic Resistance**
  Lightweight & flexible members
- **Performance**
  Optimal efficiency, exact fit and superior performance.
- **Accountability**
  Single source responsibility
- **Overall Cost**
  30% lower due to streamlined process and materials

- **Delivery Timeline**
  Longer due to on-site fabrication
- **Erection Process**
  Labor Intensive
- **Seismic Resistance**
  Heavy and rigid members
- **Performance**
  Designed to be adaptable for potential utilization
- **Accountability**
  Multiple vendors involved
- **Overall Cost**
  Higher due to increased labor and time requirements

Concrete Construction

(Traditional)

Requires multiple materials & processes:

Cement | Sand | Gravel | Rebars | Formworks

- Skilled labor plus supversion
- Heavy manpower requirement
- Weather-dependent curing process
- Weather-dependent curing process
- **Longer construction timeline**

Conventional Steel Structure

Requires on-site fabrication & assembly:

- Steel cutting and grinding
- Painting / anti-rust coating
- Welding works
- Quality depends heavily on workmanship
- Acetylene / gas cutting
- Rust / corrosion risks if not maintained
- Skilled welders & fabricators
- Weather can delay installation

More on-site adjustments needed

Pre-Engineered Buildings

Factory-built, precision-engineered system:

- Pre-designed steel components
- Minimal manpower required
- Factory fabrication (controlled quality)
- Reduced waste and consumables
- Bolted connections (minimal welding on-site)
- Less weather disruption
- Fast assembly on site
- Faster project completion

Consistent structural quality

Conventional Steel

Labor-intensive, time-consuming, and highly weather-dependent

Pre-Engineered Buildings (PEB)

Clean, fast, efficient, and engineered for precision

Conventional Steel Structure

Faster than concrete but still dependent on site work and manual fabrication quality

STEEL STRUCTURES
by PEB PHILIPPINES

STRUCTURAL SYSTEM COMPARISON:

Structural Type	Construction Speed	Material Efficiency	Overall Cost Efficiency
Reinforced Concrete (RC)	Slow - wet works, curing	High material waste	Higher material and manpower costs
Conventional Steel	Moderate - site fabrication	High material waste	Higher fabrication and labor costs
Pre-Engineered Building (PEB)	**Fastest - factory-built, quick install**	**Optimized, minimal waste**	Optimized materials and reduced labor costs

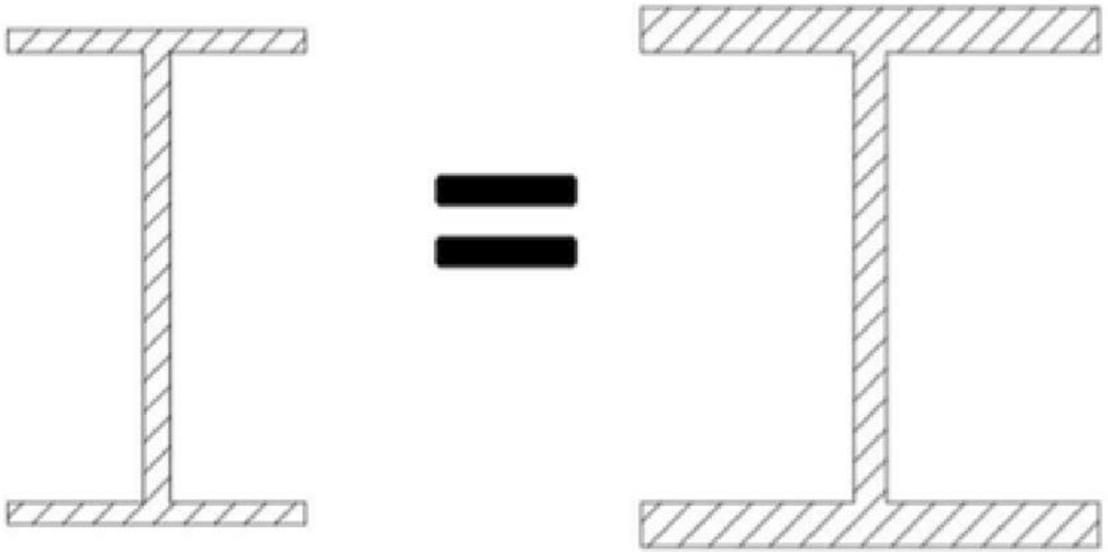

STEEL STRUCTURES
by PEB PHILIPPINES

COST SAVING

20-30% lighter than conventional buildings

SMALLER SECTION

IIGH GRADE STEEL
Primary Members: Grade 50

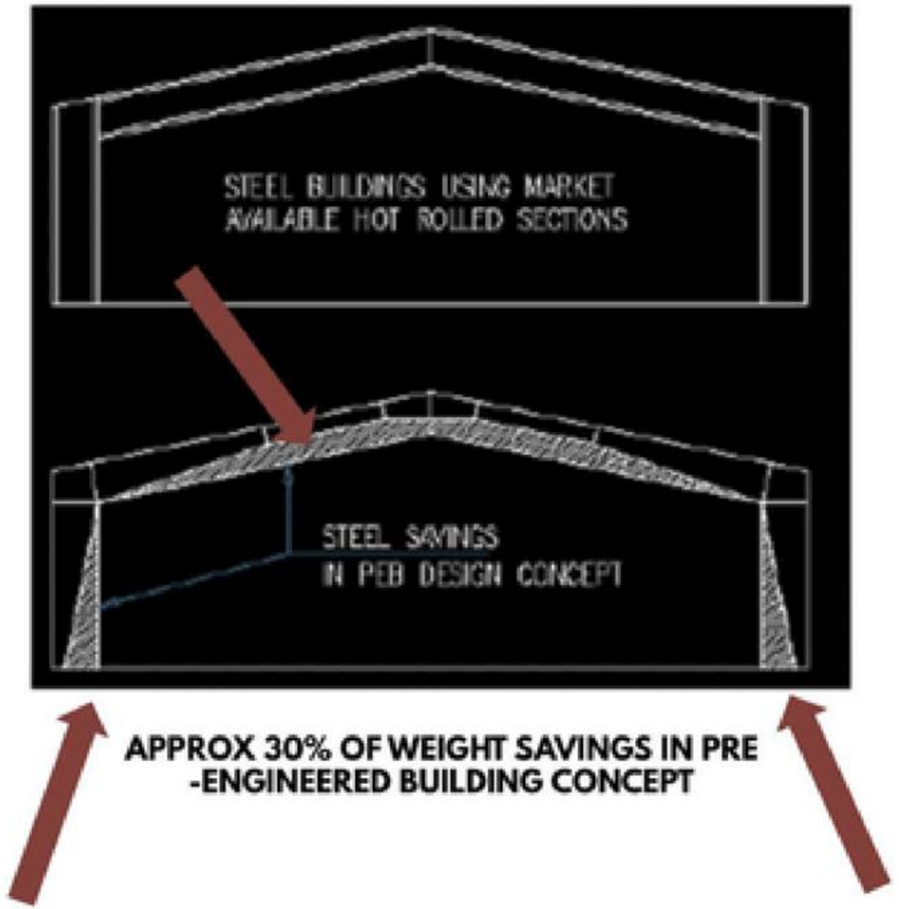

NORMAL GRADE STEEL
Primary & Secondary: Grade 36

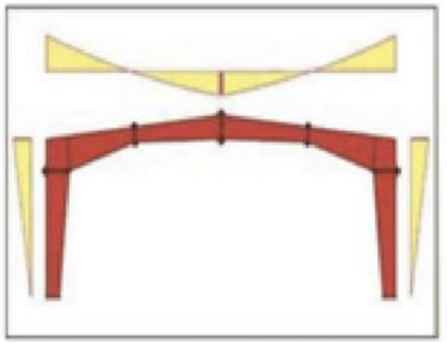

STEEL STRUCTURES
by PEB PHILIPPINES

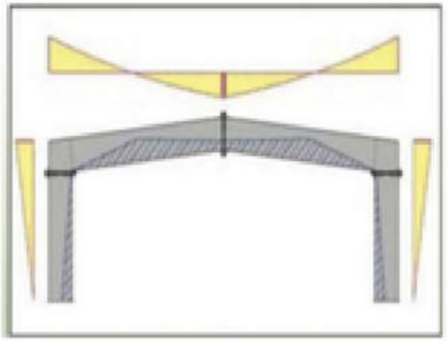

COST SAVING

The use of tapered steel sections in pre-engineered buildings offers significant cost savings by optimizing material usage, reducing weight, streamlining fabrication and installation processes, and enhancing the building's aesthetic appeal. These savings contribute to the overall affordability and efficiency of the construction project.

SIMPLE FRAME OF PRE-ENGINEERED BUILDING

SIMPLE FRAME OF NORMAL STEEL BUILDINGS

STEEL STRUCTURES
by PEB PHILIPPINES

EASY ASSEMBLY

The standardized components and simplified assembly process of pre-engineered buildings generally result in faster construction times compared to conventional steel construction. This efficiency can lead to cost savings and quicker occupancy of the building.

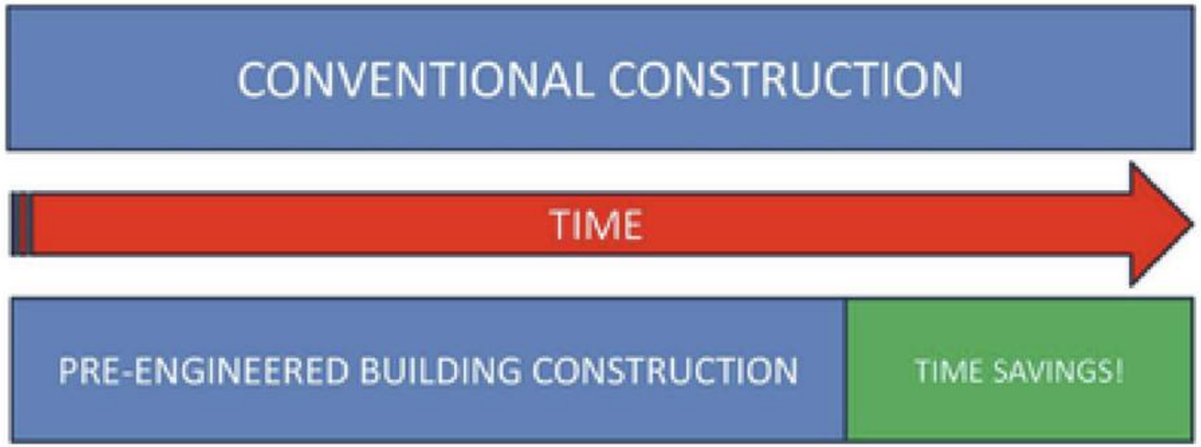

STEEL STRUCTURES
by PEB PHILIPPINES

TIME SAVINGS!

Pre-engineered buildings are assembled on-site using prefabricated components that are designed to fit together seamlessly. This modular assembly process is typically faster and requires less on-site fabrication compared to conventional steel construction, where each component may need to be fabricated and assembled on-site.

In conformità al Regolamento UE n. 305/2011 del Parlamento Europeo e del Consiglio del 9 marzo 2011 che fissa condizioni armonizzate per la commercializzazione dei prodotti da costruzione, Apave Italia Cpm Srl, organismo notificato presso la Commissione Europea con numero 0398, emette il seguente

CERTIFICATO CE

di conformità del controllo di produzione di fabbrica

0398/CPR/MP/20.023 **CE 0398**

Produttore / Sede	SEICO JSC No.160, Hoang Ngan Street, Trung Hoa Ward, Cau Giay District (Hanoi City, Vietnam)
Stabilimento/i	Km 40+900 National Road Nr 5, Com Giang District, Hai Duong Province (Vietnam)
Prodotto/i	Strutture metalliche in Acciaio
Classe di Esecuzione	EXC 2
Destinazione d'uso	Progettazione/esecuzione di strutture metalliche: Metodi 2, 5a e 5b

Il presente certificato attesta che i prodotti sopra elencati sono sottoposti dal fabbricante al controllo di produzione di fabbrica (FPC), alle prove iniziali di tipo (ITT) ed alle ulteriori prove su campioni prelevati in fabbrica in conformità ad un prescritto programma di prove e che l'Organismo Notificato APAVE ITALIA CPM S.r.l. ha effettuato l'ispezione iniziale degli stabilimenti ed il controllo di produzione di fabbrica ed eseguo la sorveglianza continua, la valutazione e l'approvazione del controllo della produzione di fabbrica, e che tutte le disposizioni concernenti l'attestazione del controllo di produzione di fabbrica descritte nell'allegato ZA della norma:

EN 1090-1:2009+A1:2011

sono state applicate.

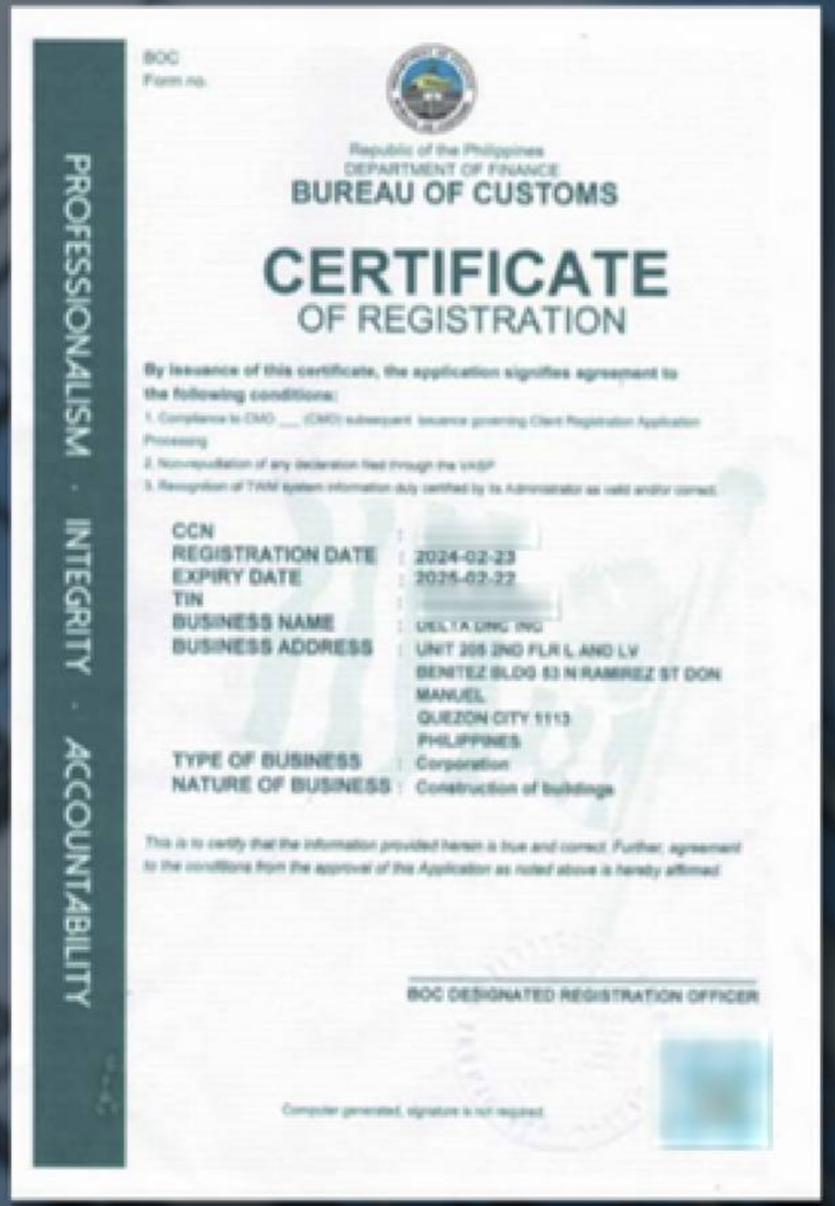

Il presente certificato è stato emesso la prima volta il **31/05/2021** e ha validità sino a che le condizioni definite nella specifica tecnica di riferimento o le condizioni di produzione di fabbrica o il suo controllo di produzione non subiscano modifiche significative. E' possibile verificare lo stato di validità del certificato all'indirizzo: http://gecs.cpmapave.it

Execution Class	**EXC 2**
Intended Use(s)	Design/Execution of metallic structures: Methods 2, 3a e 3b

This certificate attests that the products listed above are submitted by the manufacturer to the factory production control, the initial type-testing and to the further testing of samples taken at the factory in accordance with a prescribed test plan that the Notified Body Apave Italia CPM srl has performed the initial inspection of the factories and of the factory production control and performs continuous surveillance, assessment and approval of the factory production control, and that all provisions concerning the assessment and verification of constancy of performance described in Annex ZA of the standard(s).

EN 1090-1:2009+A1:2011

under system 2+ are applied.

This certificate was first issued on **31/05/2021** and will remain valid as long as the test methods and/or factory production control requirements included in the harmonized standard, used to assess the performance of the declared characteristics, do not change, and the product, and the manufacturing conditions in the plant are not modified significantly.

Bonno, **31/05/2021**
Revision n. **0**

BUILT ON EXPERIENCE, TRUSTED FOR BRILLIANCE

We are committed to delivering top-quality construction and waterproofing solutions across various locations. With a strong focus on durability, innovation, and precision, we ensure that every project meets the highest industry standards. Our expertise spans residential, commercial, and industrial developments, providing long-lasting and reliable structures.

OUR SERVICES

ROOF, TOILET & BATHROOM WATERPROOFING

Protect your property from leaks, water seepage, and structural damage with our expert roof waterproofing solutions. Whether it's a residential, commercial, or industrial roof, we apply advanced techniques and quality materials to safeguard your investment.

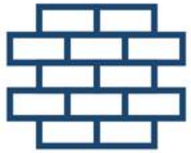

BASEMENT & PARKING WATERPROOFING

Prevent moisture intrusion, mold growth, and flooding in your basement with our specialized waterproofing systems. We utilize innovative methods to seal cracks, reinforce walls, and create a watertight barrier, ensuring a dry and safe environment.

FOUNDATION WATERPROOFING

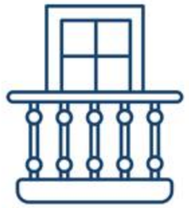

Strengthen the foundation of your building and shield it from water penetration with our foundation waterproofing services. Our team employs proven techniques to protect against soil moisture, hydrostatic pressure, and other common causes of foundation damage.

WALL WATERPROOFING

Maintain the integrity of your walls and prevent water ingress with our professional wall waterproofing solutions. Whether it's exterior or interior walls, we apply effective coatings and membranes to keep moisture out and extend the lifespan of your property.

OUR SERVICES

DECK AND BALCONY WATERPROOFING

Enjoy outdoor living spaces without worrying about water damage with our deck and balcony waterproofing services. We provide durable coatings and sealants that withstand weathering, UV exposure, and foot traffic, ensuring long-lasting protection.

COMMERCIAL WATERPROOFING

Protect commercial properties, office buildings, and industrial facilities from water-related issues with our comprehensive commercial waterproofing services. We work closely with businesses to assess their unique requirements and deliver customized solutions that meet regulatory standards and industry best practices.

SWIMMING POOL WATERPROOFING

Keep your swimming pool in pristine condition and prevent leaks with our specialized waterproofing techniques. From concrete pools to fiberglass structures, we offer tailored solutions to ensure water-tightness and durability

MAINTENANCE AND REPAIR

In addition to installation, we provide ongoing maintenance and repair services to ensure the continued effectiveness of your waterproofing systems. Our proactive approach helps identify potential issues early on and address them promptly, minimizing downtime and costly repairs.

OUR MISSION, VISION, & VALUES

Excellence

We are committed to delivering unparalleled quality in every aspect of our services. From materials used to techniques employed, we strive for excellence, ensuring that every project meets the highest standards of waterproofing solutions.

Integrity

Integrity forms the cornerstone of our operations. We uphold honesty, transparency, and ethical practices in all our interactions with clients, partners, and within our team. Our commitment to integrity is unwavering.

Customer-Centric Approach

At the heart of our business is a deep dedication to our customers. We actively listen, understand their needs, and tailor our solutions to exceed their expectations. We believe in building lasting relationships based on trust and satisfaction.

Innovation

We embrace innovation and continuously explore new technologies, methodologies, and materials in the waterproofing industry. By staying at the forefront of advancements, we offer cutting-edge solutions that are effective, sustainable, and cost-efficient.

Safety

The safety of our clients, our team members, and the environment is paramount. We adhere to stringent safety protocols, ensuring that every project is executed with the highest regard for health, safety, and environmental protection.

Team Collaboration

We foster a culture of collaboration and mutual respect among our team members. We believe that diverse perspectives and collective expertise contribute to our success. Through teamwork, we achieve remarkable results.

OUR MISSION, VISION, & VALUES

In the dynamic realm of waterproofing services, **our commitment to excellence is the guiding force that propels our mission forward**. Rooted in a foundation of unwavering values, we have set a standard for ourselves that transcends the conventional. These values serve as the bedrock upon which our company stands, shaping our identity and steering our every endeavor.

UP TO 10-YEAR WATERPROOFING WARRANTY!

We stand by our work with an up to 10-year waterproofing warranty, ensuring durability, reliability, and long-term protection for every project.
